PINAL PARAFFINE OIL CO.

Superintendent Leighton Brought Good News From the Oil Fields.

Super. L. W. Leighton of the Pinal Paraffine Oil company returned December 6 from the company's well in Hackberry wash, near Kelvin. He states that the trouble encountered a short time ago, caused by the casing in the well collapsing within a few joints from the bottom, has been entirely overcome by removing the casing and replacing the damaged joint with a new one.

The well is now in perfect condition, for which L. M. Parker, the company's driller, deserves great credit. Had he not thoroughly understood his business the company would have had to expend several hundred dollars in fishing tools and besides would have had to submit to an annoying delay.

On December 6 the well was 1289 feet deep and Mr. Parker stated that the drill was passing through layers of sandstone and conglomerate inter-layered with thin seams of whitish clay, identical with the formation he drilled through in the Los Angeles fields before striking oil.

The officers of the company are very much elated over the condition and indications of their enterprise, and hope to soon be able to report something of interest to stockholders.
